ATTENTION: Brett Norris, Vice President, New Ventures and Geoscience

Dear Mr. Norris,

**Re: Proceeding No. 1347905
Bitumen Conservation Requirements
Athabasca Wabiskaw-McMurray Area
Information Request Process**

Nexen has reviewed Paramount's responses to Nexen's information requests, and notes that some responses do not provide enough information to allow a comprehensive evaluation. Please provide the following additional information:

Nexen-PEOC-3(c)

Please provide a map title, legend, key to symbols, and any other relevant information that would be necessary to explain the map shown as "Figure 3: Nexen-PEOC-3". Please indicate any petrophysical cutoffs that may have been used to create the map.

Nexen-PEOC-6(b)

The phrase "Error! Reference source not found." occurs in three places within Paramount's response to Nexen PEOC-6(b). Please explain. Please also provide full input data to this simulation. It is not possible to fully evaluate the results of this simulation without access to the input data.

Yours truly,

Original Signed by Kellie L. Johnston
