Calgary, AB T2P 3G4

**Attention: Gary Perkins**

Dear Sir:

**Re: Phase 3 Interim Proceeding  
Staff Submission Group's (SSG) Recommendations  
Correction to SSG's Recommendations**

As a result of an inquiry from counsel for Encana Corporation, the Staff Submission Group (SSG) wishes to correct a transcription error in Table 2, on page 4 of the SSG's Recommendations for Production Status of Gas Wells, Athabasca Wabiskaw-McMurray (Recommendations). Table 2 shows Well ID 00/08-13-072-06W4/0 as having an interval at 474.1-477.3 with the recommendation that this interval be allowed to produce. This recommendation is an error caused by failing to transcribe the correct recommendation from line 1001, on page 46 of Appendix 1 (Pools and Wells Recommended for Shut-in).

The correct recommendation for interval 474.1-477.3 is for shut in.

Yours truly,

*<Original Signed by>*

Douglas A. Larder  
Counsel  
Staff Submission Group
