**Attention: Mr. Gary D. Perkins**

Dear Sir:

**Re: EnCana Oil And Gas Partnership (EnCana) Application No. 1394112**  
**Canadian Natural Resources Limited (CNRL) Application No. 1409180**  
**Husky Oil Operations Limited (Husky) Application No. 1481725**  
**Cold Lake Oil Sands Area – Clearwater Deposit**

EnCana would provide the following brief comments in response to the letter from Mr. Perkins dated April 11, 2007.

It is correct that the gas flanking bitumen cases (FL 19 Revised) relate to runs of EnCana's model, as opposed to re-runs of the CNRL model. EnCana considered that these additional runs would be of assistance to the Board in assessing the impact of gas production on flank bitumen recovery using high pressure HWCSS instead of low pressure HWCSS, in conditions representative of those existing in the CNRL lease area. EnCana does not see that other parties will be prejudiced by placing this information on the record, given that they will have an opportunity to question and respond to it.

Yours very truly,

**McCarthy Tétrault LLP**
