SUBMISSION # 28632
RE: APPLN # 1409180

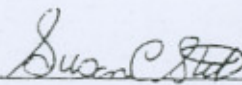

Dear Mr. Smith:

Re: Applications 1394112 and 1409180
Cold Lake Oil Sands Area - Clearwater Deposit

In the Notice of Hearing for these two applications, the AEUB invited "all interested parties to participate in the hearing by contributing technical evidence related to the effect of associated gas production on bitumen recovery by cyclic steam stimulation". Imperial Oil Resources ("Imperial") submitted technical evidence from its Cold Lake operation on September 5th, 2006 and also responded to the subsequent request for supplemental information on October 3rd, 2006.

Imperial operates a large CSS operation in the Cold Lake area. While Imperial will likely not present evidence at the hearing, we do reserve the right to cross-examine participants at the hearing on evidence that could pertain to Imperial's Cold Lake operations. As well, Imperial reserves the right to make submissions or argument in response to other hearing participant's evidence.

Yours truly,

Susan C. Stark, Manager
In-Situ Development Planning
