ATHABASCA OIL SANDS AREA**

On September 20, 2010, CNRL filed a motion in this proceeding asking the Board to order Sunshine Oil Sands Limited, Athabasca Oil Sands Corporation, and Grizzly Oilsands ULC (collectively the Bitumen Owners) to provide all bitumen pressure measurements collected by any or all of the Bitumen Owners from any wells drilled or to be drilled by the Bitumen Owners in or proximal to the Area of Application.

CNRL states that this information is critical to the Board in order to properly and fully evaluate the impact of gas production on potentially recoverable bitumen. CNRL further states that reliable pressures can be cost effectively obtained from new drills.

If parties wish to provide their written comments to CNRL's motion, please do so by September 28, 2010.

Yours truly,

David Burns
