To: Attached List of Addressees

Dear Sirs:

**RE APPLICATION NO. 1613543
SUNSHINE OILSANDS LTD.
LIEGE WABISKAW O POOL
ATHABASCA OIL SANDS AREA**

In reviewing revised Table IV.2 (shut-in list) from the above application, Board staff have identified that the producing perforated intervals indicated below are currently considered to be within the Liege Wabiskaw O Pool, but they do not appear on the shut-in list. The intervals in question are

| Well | Interval, mKB | Licensee |
|--------------------|---|-----------|
| 00/01-14-93-18W4/0 | 329-787.3 (slotted liner), 787.3-791 (OH) | CNRL |
| 00/06-19-93-18W4/0 | 230-234 | CNRL |
| 02/10-24-93-19W4/0 | 224.5-225 | Paramount |

The Applicant has not indicated reasons for not including these intervals on the shut-in list. Given the Board's previous decisions on the bitumen conservation issue indicate that shut-in decisions are to be made on a pool basis, Board staff wanted to bring this to the parties' attention.

Could each of you please provide a response to this letter indicating your position on whether the intervals described above should or should not be considered for shut-in in the course of this proceeding, notwithstanding that they do not appear on the applicant's shut-in list.

Yours truly,

Gary D. Perkins
Board Counsel

cc: B. Law (ERCB)
